

Repository Guide

How to Review This Project

Nick Mino | 29 July 2026

Recommended reading order

If you have 5 minutes

1. `Advisor_Packet/Research_Update_Summary/Research_Update_Summary.pdf`
2. Current problem / theorem agenda in `Formulation/writeup/Problem_Writeup.pdf`

If you have 15–20 minutes

1. `Advisor_Packet/Research_Update_Summary/Research_Update_Summary.pdf`
2. `Formulation/writeup/Problem_Writeup.pdf`
3. `Advisor_Packet/Intellectual_Timeline/Intellectual_Timeline.pdf`
4. `Advisor_Packet/Questions_for_Advisors/Questions_for_Advisors.pdf`

Optionally: `Advisor_Packet/Stabilized_Algorithm_Catalog_Overview/Stabilized_Algorithm_Catalog_Overview.pdf`.

Supporting evidence (verified paths)

Paths checked 29 July 2026; omitted if missing.

- `Formulation/writeup/Problem_Writeup.pdf` — Authoritative mathematical problem statement (Parts I–II).
- `Submission_Only/Timeline/intellectual_timeline.pdf` — Working redesign of the intellectual timeline (source for the packet copy).
- `Work/research-results/primitive-library/FINAL-VERDICT.md` — Concise audit of the operator library and Lean certificates.
- `Work/research-results/` — Human-readable operator papers and theorem packages.
- `Work/research-results/median/median-margin/median_paper.pdf` — Example clean entry point into one operator paper.
- `Formulation/context/overview/swarm/04_H1_catalog.md` — Summary note on the stabilized-selection catalog (H1 working survey).
- `Formulation/context/overview/Research_Scope_Timeline_and_Authority.tex` — Scope, authority, and literature integration.
- `Formulation/context/papers/INDEX.md` — Prioritized reading list of papers in the repository.
- `Formulation/research/literature/` — Digests and pattern notes used in catalog synthesis.
- `Work/architecture-discovery/README.md` — Entry point to discovery-architecture documentation.
- `README.md` — Top-level package map.

The repository contains substantial implementation and verification infrastructure. The recommended reading order above is intended to foreground the mathematical question rather than the software architecture.
